SENTRY SHADING

MOTORIZATION & INTEGRATION GUIDE

Flexible shade automation to fit your project's needs

Voice control through Alexa, Google Home and Apple Home. Integration with Control4, Crestron and more. Powered by Lutron, Somfy and Louvolite top-end systems.

01 How it works

1 The motor

Lutron, Somfy or Louvolite, built into the shade. Runs on battery, low voltage, line voltage or PoE.

2 The hub

A small processor, hidden in the control room, that connects the motors to the home network.

3 The controls

The brand's app and schedules, voice control, or any smart-home or automation system.

Just want a remote? Remotes and wall keypads pair straight to the motor. No hub needed.

02 Key motor brands we partner with

LUTRON®

Best for whole-home lighting and shade control

Power
Battery or low voltage

Hub options
Caséta Smart Bridge, RadioRA 3 or HomeWorks*

somfy®

Best for integrator-led and commercial projects

Power
Rechargeable battery with optional solar, low voltage, line voltage or PoE

Hub options
TaHoma hub, or PoE direct to Control4, Crestron, RTI and URC*

LOUVOLITE

Best for retrofits and rooms without wiring

Power
Rechargeable battery with optional solar, or line voltage

Hub options
Louvolite Smart Hub, for app and Alexa voice control

* Lutron and Somfy fully integrate into any building management system (BMS by others).

03 · INTEGRATION

Any home. Any office. Any system.

Depending on the motor selected, Sentry shades tie into any custom setup, whether the home or office runs an existing system or a brand-new one.

Voice & smart home

Motors **LUTRON** **SOMFY** **LOUVOLITE**

alexa · Google Home · **Apple Home** and Siri

Shades run by voice and join the same routines as the home's lights, locks and climate. Louvolite connects through Alexa. **Also:** SmartThings, depending on the motor.

Home automation systems

Motors **LUTRON** **SOMFY**

Control4 · CRESTRON · JOSH

Shades run alongside lighting, climate and AV through each platform's Lutron or Somfy integration. **Also:** Savant, ELAN, RTI, URC and more.

Commercial BMS

Motors **LUTRON** **SOMFY**

Shades connect to the building's management system over BACnet.
